EDUCATION

University of Florida

M.S. Computer Science (May 2027) — B.S. Computer Science, Minor in Business (May 2026)

Gainesville, FL

GPA: 3.73

- Certificate in AI Fundamentals and Applications
- Relevant Coursework: LLMs, Computer Vision, MLOps, Operating Systems, Data Structures & Algorithms

Zurich University of Applied Sciences

Exchange Semester - AI 2, Machine Learning Operations, Computer Vision with Deep Learning

Zurich, Switzerland

Jan 2025 - Jul 2025

TECHNICAL SKILLS

ML/AI: PyTorch, BERT/Transformers, Scikit-learn, Hugging Face, TensorFlow

Languages: Python, TypeScript, JavaScript, SQL, C++, Shell Scripting

Tools & Frameworks: React, Docker, Git, CI/CD, Firebase, Gradio, GitHub Actions, Agile

EXPERIENCE

ChatArmin

Software Engineering Intern

Remote

May 2025 – Aug 2025

- Extended backend request handling for system processing **10,000+ API calls daily**, implementing **TypeScript decorators** for type-safe authentication serving **300+ corporate clients**
- Resolved complex type conflicts between core framework typings and third-party plugins by designing maintainable request wrapper, **improving backend reliability** and developer experience

ABB

R&D Software Engineering Intern

Bartlesville, OK

May 2024 – Aug 2024

- Enhanced **cybersecurity** and startup reliability for **10,000+ industrial flow computers** by implementing low-level firmware protection protocols and encrypted communication layers
- Developed **10+ automation scripts** for security operations and anomaly detection, processing **50GB+ daily telemetry data** for log analysis, encryption, and secure storage
- Led 8-member intern committee organizing office-wide event with **150+ participants**

Unilever

Corporate Strategy and Technology Intern

London, UK

May 2024

- Collaborated with **40+ senior leaders** to assess **AI-driven operational frameworks** supporting innovation and supply chain efficiency across **190+ markets**; analyzed **NVIDIA's enterprise AI platforms** identifying **20% efficiency gains**

PROJECTS

SafeTrip IQ Travel Safety Advisor | *Python, BERT, K-means, Gradio, CI/CD*

Aug 2025

- Built **end-to-end ML pipeline** aggregating data from **15+ sources** (State Dept, crime statistics); **led team of 9** across data engineering, NLP modeling, and deployment delivering **real-time travel safety recommendations** for **180+ countries**
- Developed continuously retrained **BERT-based threat detection model (97% precision)** and **K-means clustering** for dynamic country risk scoring; deployed via Gradio with **automated retraining pipeline**

MLOps Football Detection System | *PyTorch, YOLOv8, GitHub Actions, Hugging Face*

May 2025

- Deployed **production MLOps pipeline** achieving **92% mAP** on custom dataset; implemented **CI/CD with GitHub Actions** reducing retraining time by **40%** and enabling **real-time inference at 30 FPS**

Solace Mental Wellness App | *React Native, Firebase, Gemini AI API*

May 2024

- Engineered **full-stack React Native app** integrating **Gemini AI API** and Firebase backend to generate adaptive journaling prompts based on sentiment analysis and user mood patterns

LEADERSHIP & RESEARCH

UF Association For Computing Machinery (ACM)

Workshop Lead

Gainesville, FL

Jul 2025 – Present

- Lead weekly technical development workshops for **2,000+ members** covering algorithms, system design, and career readiness, improving technical interview success rates

Technology for Occupational Performance Lab

Data Analysis Researcher

Gainesville, FL

Jan 2024 - Aug 2024

- Engineered **feature extraction pipeline** analyzing **30+ nights of multimodal sleep data** from OURA, WHOOP, and Garmin using **Python (Pandas, NumPy, Matplotlib)** to compare sleep and recovery metrics; recruited **35 participants**

UF Swamp Racing Team

Co-founder & Chief Safety Officer

Gainesville, FL

Aug 2023 – Present

- Oversee safety operations for **30+ member** off-road racing team, implementing comprehensive vehicle maintenance tracking system with **perfect safety record**
